After solving problems revolving around vertical planes, the development of Kupka's painting consistently turned towards space. Verticals gave him stability, but he also needed to express tension, which was accomplished with diagonals.

Bold, 17 pt

With this came a whole series of pictures called 'Vertical and Diagonal Planes'. Kupka gave the most beautiful and the most perfect of these the title 'Cathedral'. Here he combined his interests in architecture and music, which he had been interested in since his early youth. It was in France where he became inspired with the architecture of Gothic cathedrals, especially with what he called in his book 'their vertiginous musicality'.

When I was growing up, my dad had the best job I could possibly imagine: he was an arcade game and pinball technician. For me, that meant summer trips through Poland's coastal cities with their seasonal arcade parlors; peeking inside cabinets to learn programming and engineering secrets; and—of course—free games!

This painting depicts people enjoying the view of maple foliage beside the Kiyotaki river at Takao, north of the city of Kyoto, which is famous for the beauty of its maples in autumn. Beyond the thick clouds are the roofs of Jingoji temple with a red pagoda. Atago shrine covered in snow suggests the arrival of winter. On the right bank of the Kiyotaki river, beautifully dressed women with children are seated in a relaxed manner.

There is a clear evidence of the mood of Frida Kahlo in those artworks that she painted and that still remain in the Blue House, in addition to her sincerity and her stance towards the world. In *Marxism Will Give Health to the Ill*, Frida Kahlo refers to the trust in communism that was common during that age. In this portrait, the artist conjures the utopian conception of political belief that could release her from her pain. Supported in her ideology, she can go on without the crutches.

Magdalena Carmen Frida Kahlo y Calderón was a Mexican painter known for her many portraits, self-portraits, and works inspired by the nature and artifacts of Mexico. Inspired by the country's popular culture, she employed a naïve folk art style to explore questions of identity, postcolonialism, gender, class, and race in Mexican society. Her paintings often had strong autobiographical elements and mixed realism with fantasy. In addition to belonging to the post-revolutionary Mexicayōtl movement, which sought to define a Mexican identity, Kahlo has been described as a surrealist or magical realist. She is known for painting about her experience of chronic pain.
